PRELIMINARY AMENDMENT

In the Specification

Please substitute the attached substitute specification for the specification currently in the application.

In the Drawing

Please insert new Figs. 6-10 on the attached sheets after existing Figs. 1-5.

REMARKS

This preliminary amendment changes the specification and drawings of this application. All of the subject matter added in both the specification and drawings was previously incorporated by reference into the application. A few non-substantive, clarifying amendments have also been made to the specification, including amendments made to describe the field of the invention now claimed and to change instances of "media composer" to "media composition system." No new matter has therefore been introduced.
